

Gerco Onderwater

Kernfysisch Versneller Instituut (KVI) and the Rijksuniversiteit Groningen,
Groningen, The Netherlands

"I have come to Brookhaven as a foreign user for many years now, usually with great pleasure. Besides doing great physics, I have made use of the non-scientific facilities, such as the dorms, Brookhaven center and the RHIC/AGS users center, etc. As a foreign national, I have experienced the changes in security policy during the last years first hand. When elected for the UEC, I will concentrate on site access issues of foreign users."

Something about myself:

35 years old

Member of the muon g-2 collaboration

Asst. Prof. at the Kernfysisch Versneller Instituut (KVI) and the Rijksuniversiteit Groningen, Groningen, The Netherlands Main interest in precision electroweak measurements at low energies
